

LAKSHYA ASTHANA

asthanalakshya2005@gmail.com ◇ LinkedIn ◇ Leetcode ◇ Kaggle ◇ GitHub

PROFESSIONAL SUMMARY

Data Science Intern skilled in Python and Machine Learning; experienced in automation, predictive modeling, data processing, and analytical function development; delivered data-driven insights from large-scale datasets supporting process optimization, performance reliability, and deploy solutions.

SKILLS

Technical: Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, MySQL, REST APIs, EDA

Machine Learning: Predictive Modeling, Time Series Analysis, Algo Optimization, Condition Failure Analysis

Automation: Process Automation, Analytical Function Development, Data Pipeline Development, Windows Tools

Tools: MATLAB, MS Excel (Advanced), Google Colab, Jupyter Notebook, Power BI, MySQL Workbench

Soft Skills: Analytical Thinking, Problem Solving, Logical Thinking, Stakeholder Communication, Innovative Thinking

PROJECTS

Predictive Analytics and Condition Monitoring and Failure Detection System (GitHub)

- Developed Python analytical functions for predictive modeling and condition analysis on large-scale datasets.
- Applied algorithm optimization techniques improving model accuracy and processing efficiency by **23%**.
- Automated existing reporting processes reducing manual effort and improving performance reliability.
- Deployed data-driven solutions supporting operational insights and stakeholder decision-making.

Customer Shopping Behavior and Condition Analysis (GitHub)

- Cleaned and engineered **3,900+** records using Python, age bins, and median imputation for analysis.
- Wrote **10** optimized SQL queries with CTEs, window functions, and subqueries for pattern detection.
- Applied algorithm optimization segmenting customers into behavioral tiers for condition monitoring.
- Built Power BI dashboard tracking performance metrics across category, age group, and shipping type.

NLP Sentiment Analysis and Business Insights Platform (Live)

- Implemented time series ML techniques for pattern detection and failure analysis on **100+** records.
- Developed and deployed automated analytical functions using Python for real-world data processing.
- Applied machine learning techniques optimizing algorithm performance for time and space complexity.
- Built scalable solutions from prototyping to deployment supporting process optimization and efficiency.

EXPERIENCE

Nirvotech Lucknow, UP

Data Analyst Intern June 2025 -Present

- Developed and deployed automated analytical functions reducing manual processing effort by **35%**.
- Applied time series analysis on **1,000+** records for condition monitoring and performance tracking.
- Optimized data processing algorithms improving reliability and efficiency across reporting systems.

Shri Ramswaroop Digital Technology Pvt. Ltd. Lucknow, UP

Data Science & Analytics Intern (Project Based) 2025

- Developed Python analytical functions processing **10,000+** records for predictive modeling workflows.
- Improved model accuracy by **23%** through algorithm optimization and structured data processing.
- Automated existing processes deploying data-driven solutions supporting performance reliability decisions.

EDUCATION

Dr. A.P.J Abdul Kalam Technical University, Lucknow 2023 - 2027

B.Tech in Computer Science & Engineering (Data Science) **7.0/10**

Lucknow Public School 2020 - 2022

Class XII (CBSE) **75%**

CERTIFICATIONS

- **BCG Data Science Virtual Experience Program** Apr 2026
- **Deloitte Data Analytics Virtual Experience Program** Oct 2025
- **L&T EduTech Machine Learning Certification** May 2025
